1 7. (Currently Amended) A system for covering a mouthpiece
 2 and an earpiece of a telephone for protecting a user from contact
 3 with the mouthpiece and earpiece, said system comprising:
 4 an earpiece cover attachment comprising:
 5 a central wall with front and back surfaces and an outer
 6 perimeter, and a perimeter wall extending around said
 7 outer perimeter of said central wall, the back surface of
 8 said central wall and an inner surface of said perimeter
 9 wall defining a space adapted for receiving a portion of
 10 the earpiece of a telephone therein;
 11 said central wall having a plurality of holes extending through
 12 said front and back surfaces of said central wall;
 13 a mouthpiece cover attachment comprising:
 14 a primary wall with front and back surfaces and an outer
 15 perimeter, and a peripheral wall extending around said

16 outer perimeter of said primary wall, the back surface of
 17 said primary wall and an inner surface of said peripheral
 18 wall defining a space adapted for receiving a portion of
 19 the mouthpiece of a telephone therein;
 20 said primary wall having a plurality of holes extending
 21 through said front and back surfaces of said primary
 22 wall; and
 23 a case for protectively holding the attachments during periods of
 24 non-use of said earpiece and mouthpiece attachments, said
 25 case defining an interior for receiving said attachments for
 26 storage, said case comprising a compartment portion and a lid
 27 portion, each of said portions of said case having a central
 28 section and a pair of lobe sections for each receiving one of
 29 said attachments, said lobe sections extending from said
 30 central section, said central section being constricted in width
 31 as compared to a width of said lobe sections;
 32 wherein a lip is formed in said primary wall for directing voice
 33 sounds of the user toward said plurality of holes, said lip
 34 protruding from a plane of said primary wall;
 35 wherein said lip is generally semicircular and extends along a
 36 semicircular portion of the outer perimeter of said primary
 37 wall; and
 38 wherein said plurality of holes is generally located in a semicircular
 39 region of said primary wall defined by said lip.
